I'm a UI/UX designer with a background in analytics. I discovered that UI/UX is the perfect field where I can use my problem-solving skills and creativity while learning new things.I'm passionate about designing experiences that are not only visually appealing but also help people in their daily lives. When I'm not designing, I enjoy exploring new tech, traveling, and spending time with dogs.I'm excited to keep growing and creating

Projects

Self-Initiated Project | Productivity & Goal Management App

Live Productivity Tracker & Task Manager – Helping You Achieve Daily Goals and Make Time for Personal Growth

This project is centered around creating a productivity app tailored to help users stay organized and maximize their time. The app is designed to assist individuals in managing their daily tasks while carving out time for personal goals, such as improving skills, working out, or studying. By breaking down each day into manageable segments, the app provides a clear overview of what users have accomplished and what they still need to focus on. With features like task completion tracking, long-term goal planning, and AI-driven time optimization, this app aims to increase productivity, reduce stress, and create a balanced routine that promotes personal growth.

Education

Web Design for Beginners - CODL University of Moratuwa, Sri Lanka

Nov 2024 - Dec 2024

Google Data Analytics Specialization

June 2023 - sep 2023
